

**Profile** I'm a proactive and adaptable developer, with the ability to integrate in any work team, as a member or with organizational and leader responsibilities. I'm creative and organized with my projects, on its main structure and with the code I write. I'm constantly searching to expand my current knowledge.

**Abilities**

<b>Development</b> I've been developing web and desktop applications for 12 years, standalone and client/server for several purposes.	<b>User interfaces</b> I'm oriented to usability, structure and visual consistency in user interfaces, whether they are for web or desktop apps.	<b>Coding</b> I've worked with several programming languages and database engines. I write efficient, modular and well documented code.
